Solution-driven UI/UX Developer adept at contributing to highly collaborative work environment, finding solutions, and determining customer satisfaction. Proven experience developing consumer-focused websites using HTML, CSS, React, and JavaScript. Built products for desktop and mobile app users over 2+ years, meeting highest standards for web design, user experience, best practices, and speed. Designed and developed web applications across multiple APIs, third-party integrations, and databases.

Authorized to work in the US for any employer

Work Experience

UX Development

Gottlieb LLC - Jacksonville, FL
July 2019 to April 2021

Developed Physician Bill Pay to allow clients to pay their medical bills online, go paperless, see and pay their medical bills, and track their payment history. Developed Horizon, an internal web app where employees can do data log entry for patients' encounters in a hospital, communicate with other departments for missing information, allow employees to pay bills over the phone for patients, manage teams, roles, permissions, and manage alerts easier instead of having tons of emails to save time for the whole business. Maintained Partner Portal, a site where users can print and send bills to customers, manage transactions and encounters. Implemented Multi-Factor Authentication which a user may authenticate via phone or email for an extra layer of security.

Education

Lambda School (Web Development)

San Francisco, CA
2018 to 2019

Skills

- TypeScript (3 years)
- Next.js (2 years)
